In re Application of: Robert Gagnon et al.)
Application No. 09/772,132) **DECISION ON PETITION TO MAKE**
Filed: January 29, 2001) **SPECIAL UNDER 37 C.F.R. §1.102**
For: METHOD AND SYSTEM FOR) **AND M.P.E.P. §708.02(XI)**
WIRELESS ACCESS TO A USER'S)
COMPUTER)

This is a decision on the petition to make special filed October 31, 2002 under 37 C.F.R. §102(d) and M.P.E.P. §708.02(XI): Inventions For Countering Terrorism.

The petition is **DISMISSED**.

M.P.E.P. §708.02 (XI), which sets out the prerequisites for a grantable petition for Inventions For Countering Terrorism under 37 C.F.R. § 1.102(d), states in relevant part:

International terrorism as defined in 18 U.S.C. 2331 includes “activities that - (A) involve violent acts or acts dangerous to human life that are a violation of the criminal laws of the United States or of any State, or that would be a criminal violation if committed within the jurisdiction of the United States or of any State; [and] (B) appear to be intended - (i) to intimidate or coerce a civilian population; (ii) to influence the policy of a government by intimidation or coercion; or (iii) to affect the conduct of a government by assassination or kidnapping...” The types of technology for countering terrorism could include, but are not limited to, systems for detecting/identifying explosives, aircraft sensors/security systems, and vehicular barricades/disabling systems.

Applicants who desire that an application relating to inventions for countering terrorism be made special should file a petition with the petition fee under 37 CFR 1.17(h) requesting the Patent and Trademark Office to make the application special. The petition for special status should be accompanied by a statement explaining how the invention contributes to countering terrorism.

Petitioner's submission fails to meet the criteria set out with respect to countering terrorism in M.P.E.P. §708.02(XI). The claimed invention is generally directed to a system for wireless access to a computer. Note, that there is no mention of terrorist activity in the disclosure. A flexible system for wireless access does not directly prevent “violent acts or acts dangerous to human life that are a violation of the criminal laws of the United States or of any State” or activities “that would be a

criminal violation if committed within the jurisdiction of the United States or of any State". Furthermore, although the system may be employed by members of law enforcement, wireless access does not directly prevent acts that appear to be intended to intimidate or coerce a civilian population, influence the policy of a government by intimidation or coercion, or affect the conduct of a government by assassination or kidnapping.

As a result, no advancement in the technology of countering terrorism has been persuasively shown.

Accordingly, the petition is **DISMISSED**. The application file is being forwarded to Central Files to await examination in its proper turn based on its effective filing date.

Any request for reconsideration must be filed within TWO MONTHS of the mailing date of this decision.

It is suggested that Applicant review M.P.E.P. §708.02 regarding other grounds available for filing a petition to make special. In particular, note M.P.E.P. §708.02(VIII): Accelerated Examination, which does not place limitations on the subject matter of the application.
